

Head Office

P.O. Box 440145, 80750 München/Germany
Frankfurter Ring 193, 80807 München/Germany
Telephone +49 89 323 94 - 0
Telefax +49 89 323 94 - 329

Branch Office

P.O. Box 6340, 44520 Lünen/Germany
Zum Holzplatz 2, 44536 Lünen/Germany
Telephone +49 231 434 01 - 0
Telefax +49 231 434 01 - 11

Subsidiary Plant

P.O. Box 55, 02992 Bernsdorf/Germany
Kamenzer Str. 4-6, 02994 Bernsdorf/Germany
Telephone +49 357 23 237 - 0
Telefax +49 357 23 237 - 20

MAURER Tuned Mass and Viscous Dampers

Technical Information and Products

MAURER – Tuned Mass and Viscous Dampers

Contents	Page
1. Introduction for TMDs and viscous dampers	3
1.1 Why are TMDs or/and viscous dampers necessary?	3
1.2 Functions of a TMD and a viscous damper	4
2. Adaptation of the TMD onto the main system (structure)	6
2.1 Adaptation criteria	6
2.2 Consequences of a wrong or bad adaptation of the TMD	7
2.3 Assessment of the three main adaptation criteria for a TMD	8
3. Necessary technical data for the design of a TMD	9
4. Optimal procedure for a TMD dimensioning	9
5. Different types of MAURER- TMDs (MTMD)	9
5.1 MTMD-V: Vertically acting tuned mass damper	10
5.1.1 Technical description of MTMD-V	10
5.1.2 Application of MTMD-V-5000: Singapur Skypark - Singapur	13
5.1.3 Application of MTMD -V-550/725/1200: Abandoibarra Bridge Bilbao - Spain	14
5.2 MTMD-H: Horizontally acting tuned mass damper	15
5.2.1 Technical description of MTMD-H	15
5.2.2 Application of MTMD-H-1900: Port Tawe Bridge in Swansea – United Kingdom	17
5.2.3 Application of MTMD-H-4000: Olympic Bridge in Turin – Italy	18
5.3 MTMD-P: Pendulum tuned mass damper	19
5.3.1 Technical description of MTMD-P	19
5.3.2 Application of MTMD-P-2100	20
5.3.3 Application of MTMD-P-62847: Alphabetic Tower in Batumi – Georgia	21
5.4. Adaptive ATMD Systems	22
5.4.1 Technical Description of ATMDs	22
5.4.2 Application of ATMD-P-5200: Bridge Volgograd – Russia	23
6. Proposal for a tender text for tuned mass dampers	24
7. Viscous dampers (MHD) for displacement & seismic control	25
7.1 Technical description of MHD	25
7.2 Application of MHD-250: Footbridge Traunsteg in Wels - Austria	29
7.3 Application of MHD-3000: Russkiy Island Bridge at Vladivostok - Russia	30
8. Proposal for a tender text for viscous dampers	31
9. Testing and recording of function characteristics	32
